

Hire Fleet Expansion for ESS Safeforce

One of Crowcon's largest distributors ESS Safeforce have recently taken 60 Detective Plus transportable gas monitors to extend their existing hire fleet to over 200 units.

In addition to this, ESS Safeforce have also added a further 150 Triple Plus Plus monitors and 50 Tetra 3 monitors to the same fleet. In all ESS Safeforce have approaching 2000 monitors available for hire as well escape sets, full breathing apparatus, access equipment, hazardous area lighting and radios, and cable location equipment.

The decision to expand the fleet was taken to support ongoing development of their 'Shutdown Services' operation that provides equipment and other services to large industrial sites when they are 'shutdown' for maintenance purposes.

Within the same field of operation ESS Safeforce have purchased new Breathing Air Trailers and Compressors and have recently acquired NSS Northern Site Supplies (a specialist in Petro Chemical and Off Shore equipment hire) making in total an investment of approaching £2 m.
